

## EASY BARN SWALLOW NEST CUP!

You need:

- one 5" planting cup
- scissors
- two thumb tacks
- hammer

Cut 2" down from the top of the planting cup, and cut almost all the way around the rim, leaving a 3" lip to attach it to the wall. Attach it in a sheltered location (like a covered porch) with the thumb tacks. Tap them in securely with a hammer. The swallows will add mud and feathers inside the cup!
